

Catalogues Upload: Guidelines

Columns' Validations

Column Name	Mandatory (M) / Optional (O)	Validation
Product Code	M	MinCharacterLength: 5; Must be Unique
Amazon ASIN	O	MinCharacterLength: 5, and only required for Amazon-Upload
Name	M	MinCharacterLength: 5
Sku Id	M	MinCharacterLength: 5, Must be unique for each size
Selling Price	M	allowedRange: [1, 1000001]; Must be less than MRP
MRP	M	allowedRange: [1, 1000001]
Cost Price	O	allowedRange: [20, 20000]
Quantity	M	allowedRange: >= 0
Packaging Length (in cm)	M	In range of 1 to 50
Packaging Breadth (in cm)	M	In range of 1 to 50
Packaging Height (in cm)	M	In range of 1 to 50
Packaging Weight (in kg)	M	In range of 0.05 to 10
GST %	O	In range of 0 to 100
Image 1 to Image 10	O	Cloud Storage: Dropbox link (It should be a public link, not private) Each Image size < 8MB Image File Type: PNG, JPEG
Video 1 and Video 2	O	Cloud Storage: Dropbox link (It should be public link, not private) Each Video size < 100 MB Video File Type: MP4, WebM, MOV, AVI, MKV, WMV, FLV
Product Type	O	Download "Product Types" and fill in the exact corresponding field value from the "Value" column.

Column Name	Mandatory (M) / Optional (O)	Validation
		
Size	M	MaxCharacterLength: 40 Size should be unique for each sku_id and product code
Size Type	O	MaxCharacterLength: 100 Column text Should be : 'size' or 'variant' Variant Eg: 12KT, Pack of 2 , 8GB etc. Size eg: S,M, XL, 36, 6UK etc.
Colour	O	MaxCharacterLength: 100
Description	O	
Return Condition	O	Format: Number; allowedRange: >= 0
Visibility	M	allowedValues: ['true', 'false'],
Size Chart	O	Cloud Storage: Dropbox link (It should be a public link, not private) Each Image size < 8MB Image File Type: PNG, JPEG
Pickup Point	M	Format: Number (based on different pickup address's sequence)
HSN Code	O	MinCharacterLength: 4 and MaxCharacterLength: 10 and no spaces
Customisation Id	O	Valid customisation page id should be given
Associated Pixel	O	Pixel Mapping based on the Pixels added in the Marketing section of seller dashboard 1 OR 2 OR 1,2 OR 2,1
Attribute Name (attr1, attr2, attr3, attr4, attr5)	O	

collection_1, collection_2, collection_3	O	
--	---	--

Additional Important Guidelines:

1. [Product Code, Sku Id, and Size] - all three combinations should be unique for new-catalogue generation
2. If you upload a catalogue and there is a problem with the image link, a catalogue will also be created in that case. In order to update the image link - Use the “Bulk Update Image” and corresponding sample CSV under the “Catalogue Bulk Update” section
 - a. Catalogue image link does not get re-uploaded if the existing product is being updated. To update ALL images of a product code, use the “Bulk Update Image” feature

The screenshot shows the 'Catalogue Bulk Update' section of a web interface. It features a 'Field Selection' dropdown menu currently set to 'Bulk Update Image', with a 'Download sample CSV' button to its right. Below this is an 'Upload CSV' section with a 'Select Upload Type' dropdown menu also set to 'Bulk Update Image'.

The screenshot shows the 'Upload CSV' section. The 'Select Upload Type' dropdown menu is open, displaying three options: 'Bulk Update Image' (highlighted), 'Create Catalogue Bulk Upload', and 'Amazon Import'. To the right of the dropdown is a blue 'Upload CSV' button. At the bottom right, there are navigation controls including a left arrow, a page number '1', and a right arrow.

3. During Create Catalogue Bulk Upload, if a product with a product code already exists for the seller, then all SKU sizes matching CSV rows will be updated.
4. For deleting the entire catalogues and catalogues columns data in bulk, use the ‘Delete Catalogue’ and ‘Delete Catalogue Data’ feature respectively from the Bulk Upload feature. In case of deleting the entire catalogue, download the sample csv, add the product code(and/or SKU IDs if required) and use ‘del’ keyword in the Action column. In case of deleting the catalogue column data, download the sample csv, and the product codes and use ‘del’ keyword in the required columns.

Upload Time:

Catalogues typically upload within 30 minutes to 3 hours, but in rare instances, the process may take up to 24-48 hours."
